Code Enforcement

As summer transitions to autumn, the leaves begin to change colors and eventually begin to fall. This season change creates an increase in lawn maintenance duty of the lawn mower, leaf rake and blower. During this time, the City of Conover works hard to remove all the leaves, grass clippings, tree limbs placed out for collection along the roadway edge. As part of this service, the City must also protect its city street travelers and the waterways that we all rely on.

If you are raking or blowing your leaves, grass clippings or placing discarded limbs out for city pick-up, make sure these items stay out of the roadway. This will keep the roadway passage clear and prevent any tight spaces for passing vehicles. A roadway that is bottlenecked with leaves can increase the chance of accidents for vehicles, pedestrians and even children at play.

By removing leaves and grass clippings from our yards and piling them up near storm water curbs and drains, the chance of them reaching our river and stream system increases. This yard debris, if washed into the stream and river system, will decrease water quality and is considered pollution. To help reduce this pollution, the leaves, grass clippings and tree limbs must be out of any gutter or drainage system and especially away from storm drains.

If you see any potential violation to city ordinances, it can be reported to the code enforcement officer at 828-464-4698 or via email at codeofficer@conovernc.gov.
